Explanation of the order form

You can use this form to indicate the sizes up to a maximum of four horses.
For team harnesses please indicate the position of the particular horse in the team.

The accountnumber and orderconfirmationnumber will be filled out by us after receipt of your order.
You can enter your contact information and your order in the right column.

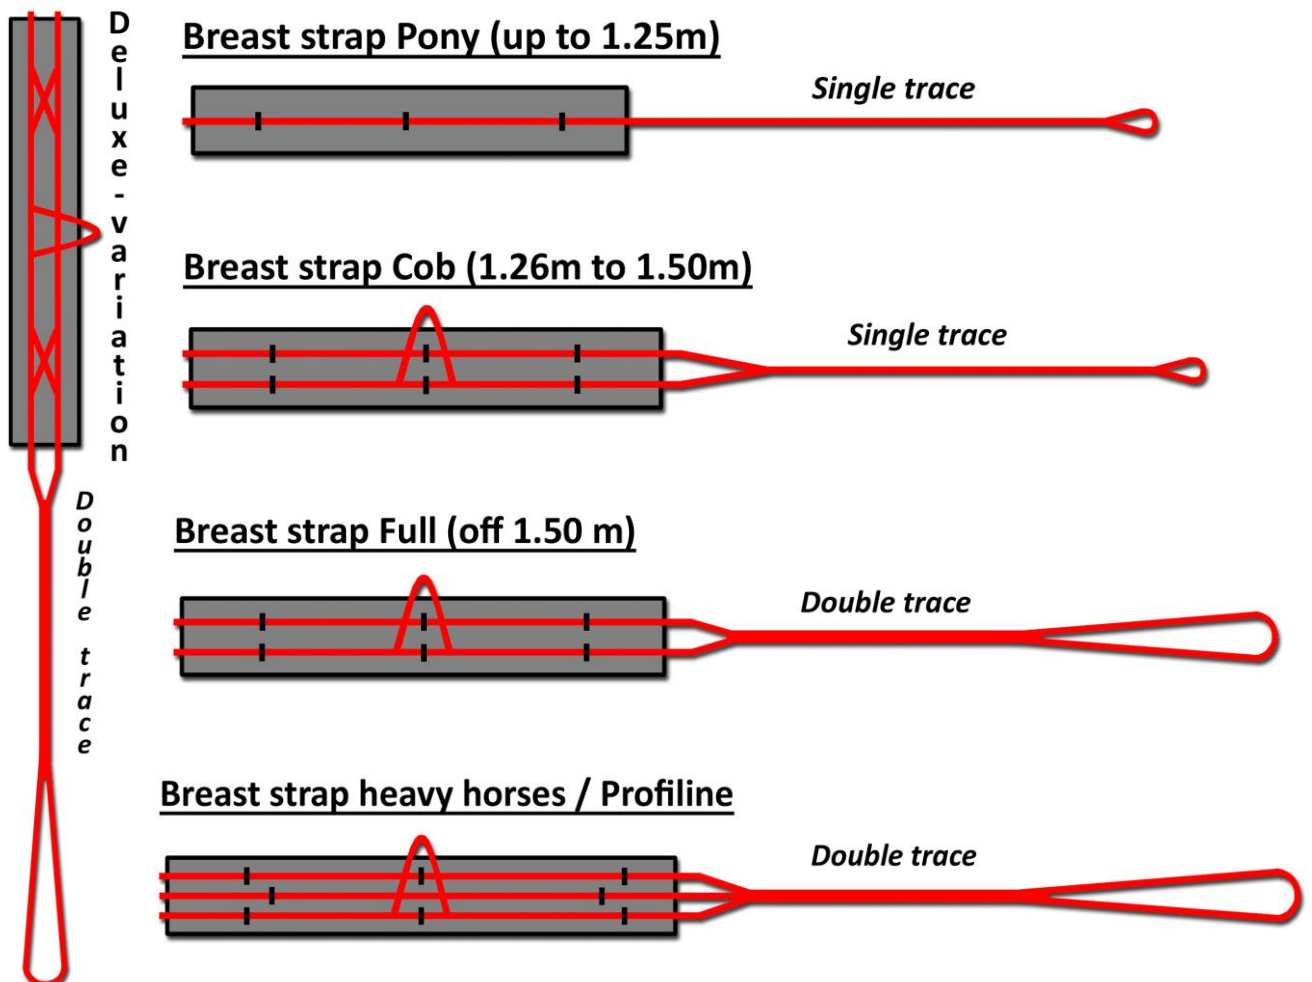

If you wish to order a complete harness, please enter the quantity in the box right to 'single / double / four in hand harness complete'.

If you wish to order separate parts, please enter the quantity in the corresponding box.

The standard harnesses for **Pony, Cob, Full** as well as **Profiline** differ in the construction of the breast strap and the traces. However, you are not tied to these standard models.

Eg, for the model Full, you can choose the Profiline construction.

Profiline is especially developed for more than average expectations and is aside of additional strengthening at the breast strap and traces accommodated with lining at the wither strap.

The **Kombi harness** enables driving single and pair with one and the same harness.

Option S is based on a single harness, with adjustments to a double driving harness such as additional lining of the saddle.

Option D is actually half a double driving harness with additional attachments for the shaft.

The **DeLuxe** version is manufactured in a way that no anchorages are visible.

Please clearly fill out the colour you wish. Without an indication you will receive the harness in the standard colour black.

For colour combinations, you can order the separate parts in different colours.
